

Projector is still a projector

But the way how we connect to it is different

No more cable passing when changing presenters

Elegant design with simplicity in nature

Make presentations directly from mobile phone and tablet

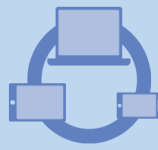

View presentation live on laptop, mobile phone and tablet

RecoMedia is a wireless presentation device which enables presenter to break free from any cable. It transforms display devices, such as projector and LCD TV into a collaborative display for efficient meeting setup. It enables anyone to present content from a laptop, smartphone or tablet wirelessly to the display.

Key Features

Require no configuration for presenters. With a simple click of button presentation slides will be shown on projector

Support to Windows, Mac OS, iOS, and Android

Operate at 2.4 GHz or 5 GHz WiFi band

Connect to projector with HDMI or VGA port

Connect mobile phone and tablet to make presentation, and view live presentation

Conduct presentation session in moderated mode

Configuration

Specifications
