

# Upgrading a Collaboration Platform with Cisco BE6000 and TMS Direct

- Universiti Sains Malaysia

Upgrading of collaboration platform Cisco® with Business Edition 6000 (BE6000) and Cisco TelePresence Management Suite (Cisco TMS).

**Cisco** BE6000 is delivered with a suite of preloaded, ready-to-activate unified communications and collaboration applications. And as your business needs grow, you can easily “turn on” the additional application options supported, including contact center, video conferencing, [Cisco Webex® Hybrid Services](#), and more. Cisco BE6000 and Cisco Webex can be purchased together with a subscription using the [Cisco Collaboration Flex Plan](#), which enables customers to simplify purchasing with meetings, messaging, and calling capabilities in one offer.

**Cisco** TelePresence Management Suite (Cisco TMS) enables; to manage, deploy, and schedule the entire video network, including telepresence, from one platform. Cisco TMS provides visibility and centralized control for on-site and remote video systems, and aims to make tele- presence accessible and successful within an organization.

## Project solution:

- **Cisco®** Business Edition 6000 (BE6000)
- **Cisco** TelePresence Management Suite (Cisco TMS)
- **Cisco** SX10 collaboration endpoints
- **Cisco** SX20 collaboration endpoints
- **Extron** HC404 meeting space collaboration system
- **Extron** DTP Tx and Rx system
- **Harman's** Products, **Soundcraft**, **Crown** and **JBL**
- **Sharp** 60" LED Smart c/w NB TV Bracket
- **Belden** / **NuroMicro** cables & **SwitchCraft** Connectors

*“According to the head of communication, the upgrade was comprehensively planned after the assessment has been carried out. The requirement based on some evaluation such as obsolete equipment, end of service and unsupported features was considered. The upgrade was necessary in providing an extensive videoconference system to provide support to the university's needs”.*
