

The video conferencing and wireless projection system bring peace of mind to Kulim Advanced Technologies Sdn Bhd

Boosting daily work and collaboration by simplifying daily tasks. "Visitors and staff have been pleasantly surprised by the simplicity of the collaboration experience.

The Stem Training Room was equipped with a Nureva Dual HDL3000 video conference set that gives full-room audio coverage with mounted the soundbar (microphone & speakers bar). Adding with standard 120-inch diagonal motorised screen and a 4500 lumen projector in order to accommodate all of the participants.

Wired and wireless systems are installed in the this room to facilitate both legacy and modern applications. While wireless technology is undeniably impressive and remarkable, wired cable comes in handy in times of emergency.
